Subject: Chlorpyrifos Short Communication

Dear Professors Rauh and Whyatt

Our paper has now been accepted with a proviso, as shown in the email correspondence below. The accepted paper will be shortly posted on our website (see: <https://www.tera.org/about/news.html>) with the following note:

This manuscript is in press with the journal Regulatory Toxicology and Pharmacology. If published, this journal will be the only definitive repository of the content that has been certified and accepted after peer review. Copyright and all rights therein are retained by Elsevier.

As before, we would be happy to obtain your data, suitably coded, whereby individuals are not identified so as to protect confidentiality. This should allow others to confirm your work and promote risk management decisions made with transparency.

Sincerely,

Michael Dourson, PhD, DABT, FATS, FSRA

Dear Dr. van den Berg

On behalf of all of my authors, I accept the proviso. As you know, we have sent 4 emails to Professor Rauh and colleagues asking for their data, with personal information suitably redacted, and also let them know about our journal submission. Thus, they should not be surprised at your invitation.

Cheers!

Michael Dourson

Manuscript number: RTP-19-380R1

Dear dr Dourson

With a proviso I am inclined to accept your revision of this short communication. However, before doing so I like to provide your revision to Rauh et al and like to give these authors the opportunity for a reply that I intend to publish back to back. I will give the authors one month time to do so, if a reply is not provided I will accept the paper as it stands.

With my best regards,

Martin van den Berg
